

Project Demo Planning

Date	3 July 2026
Team ID	SWTID-2026-9706
Project Name	Voice Based Concept Understanding Analyser
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Explain that students can't objectively verify their own spoken understanding of a concept	1	Palak Suthar, Neelam Kumari
2	Solution Overview	Briefly explain VBCUA's pipeline: Whisper → Sentence-BERT → Librosa → Scoring → PDF	1	Palak Suthar
3	Live Feature Demonstration	Show the actual app: select a concept, upload audio, click Analyze, walk through results (transcript, scores, waveform), download PDF	5-6	Palak Suthar
4	Code Walkthrough (brief)	Quickly show the modular file structure (app.py, speech_to_text.py, etc.)	1	Neelam Kumari
5	Testing & Results Summary	Mention scoring formula was verified against a known example (60/100 → Moderate Understanding)	1	Neelam Kumari
6	Conclusion & Future Scope	Wrap up: what VBCUA achieves, future ideas (multilingual, progress tracking)	1	Palak Suthar

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Keep it to 2-3 sentences — the "why" before the "what"
2	Solution Overview	One slide/screen showing the architecture is enough — don't over-explain
3	Live Feature Demonstration	This is the core of the video — most time should go here; screen-record the actual app running
4	Q&A Session	If this is a live/recorded submission with no real audience, replace with "Anticipated Questions" — e.g. "Why no login?", "Why session state instead of a database?" and answer briefly
